Sat-Fi2 Firmware Update Using the Sat-Fi2 Web Console

Sat-Fi2 firmware updates can be performed via the Sat-Fi2 App or using the Sat-Fi2 Web Console. The below instructions detail the process for updating the Sat-Fi2 using the Sat-Fi2 Web Console.

Step 1 – Download Sat-Fi2 Firmware Update

1. Prior to downloading the update, delete any previous versions of Sat-Fi2 "update.zip" that are in your download directory.

2. On a Wi-Fi enabled computer, open a web browser and proceed to https://www.globalstar.com/products/voice-and-data/sat-fi2. .

3. Scroll to **Downloads and Links** section and download the Latest Sat-Fi2 Firmware Update.

4. Save the update to your computer, do not attempt to run the program directly.

Step 2 – Connect to the Sat-Fi2 Wireless Network

1. On a laptop, turn on the Wi-Fi connection and connect to the SatFi2_<XXXXXX> network (<XXXXXX> is the ICCID number of the Sat- Fi2 device) **Example: satfi2_004595**

2. A Wi-Fi connection dialog will be displayed. In the Password text-entry field, enter the appropriate password. (Default Password is **satfi1234**)

3. Press the **Connect** button.

Step 3 - Access the Sat-Fi2 Web Console

1. Open a web browser.

2. In the address bar enter: **http://192.168.1.1:8080**

3. A Sat-Fi2 Login screen will be displayed.

   - In the **Username** field, enter the Admin Username (Default is **admin**)

   - In the **Password** field, enter the password (Default is **admin**)

   - Select the **Login** button.

4. The Sat-Fi2 Admin Console screen will be displayed.

Admin Console

Menu
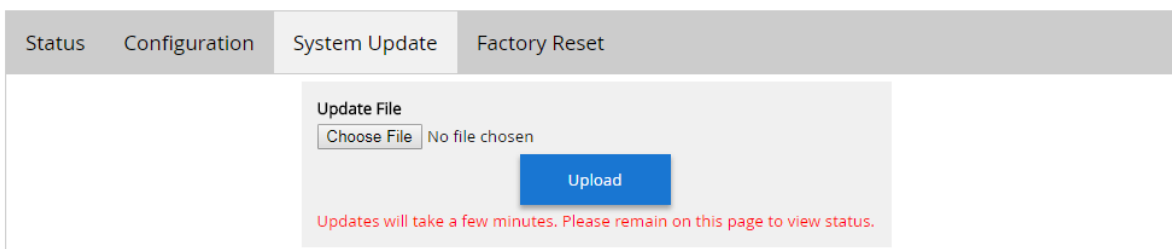

| Users | Wi-Fi Configuration | Firewall | Device Configuration |

Step 4 – Perform Firmware Update

1. On the Admin Console Menu screen select ![Device Configuration icon] .

2. The Device Configuration screen will be displayed, select the System Update tab.

‹ Device Configuration

| Status | Configuration | System Update | Factory Reset |

Update File

Choose File | No file chosen

Upload

Updates will take a few minutes. Please remain on this page to view status.

3. Select the **Choose File** button and navigate to and select the Sat-Fi2 firmware update downloaded in Step 1 – Download Sat-Fi2 Firmware Update.

   The update must be named "update.zip" any other name will result in a failure to update

4. Select the **Upload** button to start the firmware upload process.

WARNING: **Once the Upload button has been selected, do not power off the Sat-Fi2 unit during the upgrade process. Doing so may render the device inoperable.**

5. After the firmware is uploaded the Update process will begin.

System Update

Update processing...

6. When the firmware update is complete the Sat-Fi2 will reboot and you will be disconnected from the Sat-Fi2 Wi-Fi network. The Firmware Update is complete and ready for use.
